

Department of Electronics and Communication Engineering LNCTE Bhopal

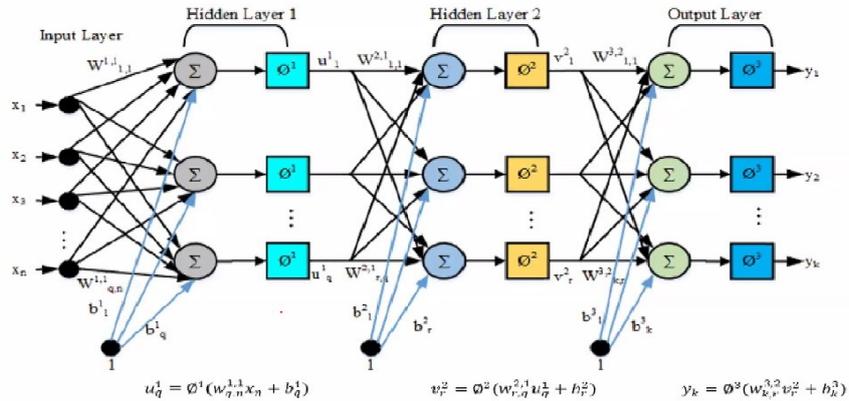

Publicity Report of February 2021

- International Conference on “Soft computing techniques & Communication Engineering” is organised by Department of EC of LNCT Group of Colleges on 30-01-2021. Participants from LNCT group (Faculties, Students) & outside has participated and presented their research paper. Conference had been successfully completed under the guidance of Dr. Abhinav Bhargava (HOD, EC-LNCTE) coordinated by Dr. Rohit Kumar Rathor (Assistant Professor).

Presentation Area “5G: Impact on Pharmaceutical Industry in Indian”

Presented By:
Ms Manju
Ph.D. Research Scholar
Department of Economics
Panjab University Chandigarh

Recording

What is 5G TECHNOLOGY ?

5G technology represents the “Fifth-generation” in a field of wireless communication network. It is promises decreased latency, high speeds, and a more associated environment friendly. It is a new global wireless standard after 1G, 2G, 3G, and 4G networks. 5G enables a new kind of network that is designed to connect virtually everyone and everything together including machines, objects, and devices.

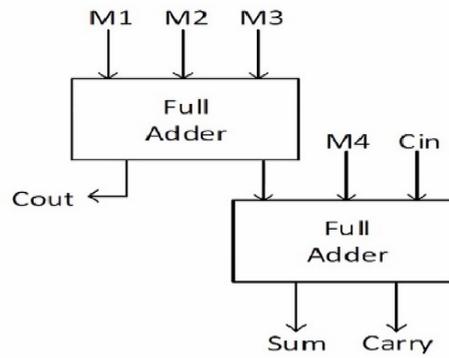

5G wireless technology is meant to deliver higher multi-Gbps peak data speeds, ultra-low latency, more reliability, massive network capacity, increased availability, and a more uniform user experience to more users. Higher performance and improved efficiency empower new user experiences and connects new industries like pharmaceutical industry. The 5G technology is a paradigm shift because it is not only about a network. Instead, it is about an ecosystem of devices and sensors which can be intelligently connected in order to overhaul business and economic policy.

MEMS Impedance Flow Cytometry: A computation analysis for biological cell separation

Dr. Kulwant Singh (Deputy Director, E-Cell-MUJ)
Associate Professor, Department of ECE,
FlexMEMS Research Centre (FMRC)
Manipal University Jaipur

Content

- ▢ Role: Need of Microfluidics in Society
- ▢ Background: Point of Care Diagnostic Devices
- ▢ Overview: Flow Cytometry
- ▢ Flow Cytometry Potential
- ▢ Functioning:
 - Impedance Flow Cytometry for Cell Detection
 - Impedance Flow Cytometry for Cell Separation
- ▢ Bio-cell Levitation
- ▢ Flow Cytometry Structure Optimization
- ▢ Current Stage of Flow Cytometry
- ▢ Future Advancement
- ▢ What we are doing at MUJ?

Functioning: Impedance Flow Cytometry for Cell Separation

Movement of Cell in Fluid with Influence of Electric Field Dielectrophoresis

CASE-I: $\epsilon_{cell} < \epsilon_{medium}$

Cell moves away from electrodes (Weaker Electric Field)

DEP force was first explored by researcher H.A. Pohl in 1958 (Pohl, 1958) and can mathematically expressed by equation below

$$\langle F_{DEP} \rangle = 2\pi\epsilon_m R^3 \text{Re}[CM^*] \nabla |E_{rms}|^2 \quad (1)$$

Here:

CASE-II $\epsilon_{cell} > \epsilon_{medium}$

Cell moves towards electrodes (Stronger Electric Field)

R= Radius of the cell/particle

ϵ_m = Medium permittivity

[CM^*] = Clausius Mossotti factor

$|E_{rms}|^2$ = RMS value of electric field

ϵ_p^* = Complex permittivity of particle

ϵ_m^* = Medium permittivity of medium

$$CM^* = \left(\frac{\epsilon_p^* - \epsilon_m^*}{\epsilon_p^* + 2\epsilon_m^*} \right)$$

$$\epsilon_p^* = \epsilon_p - i \frac{\sigma_p}{\omega}$$

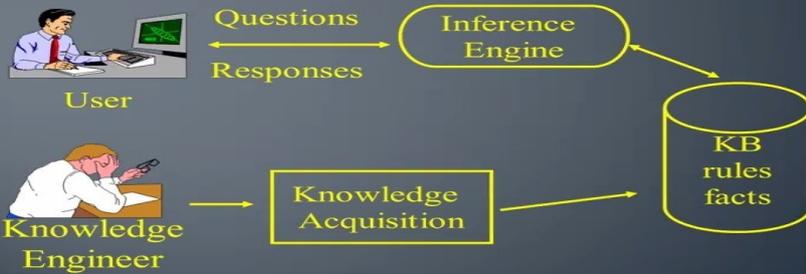

$$\epsilon_m^* = \epsilon_m - i \frac{\sigma_m}{\omega}$$

What is Soft Computing?

- Soft Computing is a field that currently includes
- Fuzzy Logic
- Neural Networks
- Probabilistic Reasoning(Genetic Algorithms and Evolutionary computing etc.)
- Other related methodologies
- Soft Computing combines knowledge, techniques, and methodologies from the sources above to create intelligent systems.

AI Approach

- An expert system: one of the most successful (conventional AI products)

NCO Design: for Direct Digital Frequency Synthesis (DDFS) & Digital Up Converter/Digital Down Converter

Application	Requirement			
	Frequency Resolution	Resource Utilization (Area)	Conversion Time/Speed	Design Complexity
1. Direct Digital Frequency Synthesis (DDFS)	Good (Generates frequency in MHz)	Low	Lowest	Simple
2. Digital Up Converter (DUC)/Digital Down Converter (DDC)	Precise (Directly generates frequency in GHz)	Low	Moderate	Moderate

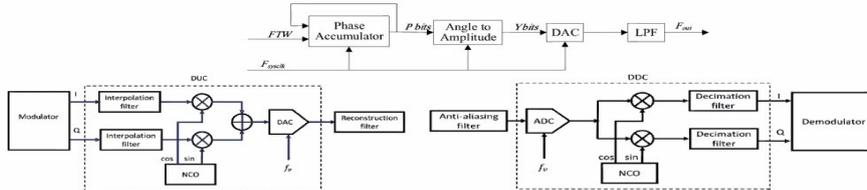

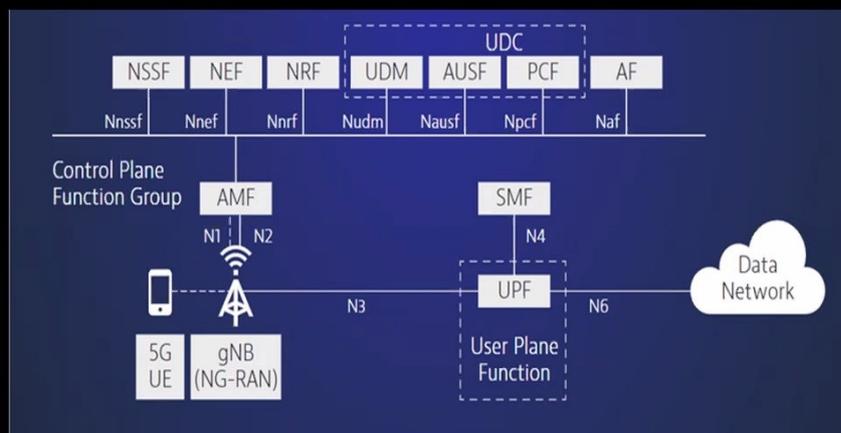

Fig.4: Block Diagram of 1) Direct Digital Frequency Synthesis
2) Digital up converter (DUC) and Digital down converter (DDC)

5G CORE ARCHITECTURE

LAKSHMI NARAIN COLLEGE OF TECHNOLOGY EXCELLENCE, BHOPAL

- EC department LNCTE has organized an Interaction program for EC 3rd sem students with placed students (Ms. Karthika Raj, Mr. Md. Taqui Siddiqui, Mr. Shashank Acharya and Mr. Satyam Shashank) on 04-02-2021 from 1:00 to 2:00PM. These placed students have shared their experiences during process of selection under various levels such as how to make resume, how to improve soft skills. Placed students also have satisfied all queries of upcoming aspirants to be placed for the campus placement. The session had been successfully completed under the guidance of Dr. Abhinav Bhargava (HOD, EC-LNCTE) coordinated by Prof. Neeta Sharma (Assistant Professor).

LAKSHMI NARAIN COLLEGE OF TECHNOLOGY EXCELLENCE, BHOPAL

- EC department LNCTE has organized an online webinar on “Carrier opportunities in Internet of Things “for EC 3rd sem LNCTS students with Speaker Mr. Aizaz Tirmizi, HR Manager SOFCON India Pvt. Ltd. Bhopal on 06-02-2021 at 02:00 PM. The session was too informative and Interactive. Students have learnt about IOT, Its Monitoring and Controlling using Internet, Its applications, A brief idea of Board of Arduino and Raspberry Pi, Its connectivity and Coding part. The session had been successfully completed under the guidance of **Dr. Abhinav Bhargava (HOD, EC-LNCTE)**.

The screenshot shows a Microsoft Office 2010 window with a slide titled "Webinar on Career Opportunities in Internet of Things". The slide features the LNCTE logo (Lakshmi Narain College of Technology Excellence) and the NBA logo (National Board of Accreditation). The main text reads "Webinar on Career Opportunities in Internet of Things". The date and time are listed as "Date: 6th Feb' 2021" and "Time: 2:00PM". A blue box states "e-Certificate will be given to all participants". The Zoom ID is 97074284511 and the password is 112233. The speaker is Mr. Aizaz Tirmizi, HR Manager at SOFCON India Pvt Ltd, Bhopal. The event is organized by the Department of Electronics & Communication Engg.

The graphic is titled "THE INTERNET OF THINGS" and features a central network of icons connected by dashed lines. The icons include a smartphone, a laptop, a printer, a Wi-Fi symbol, a mail icon, a house, a person, a music note, and a headset. At the top, there are logos for Sofcon Training (An ISO 9001:2008 Company), the Government of India Ministry of Skill Development & Entrepreneurship, N-S-D-C National Skill Development Corporation (Transforming the skill lands), and Skill India (कौशल भारत - कुशल भारत). At the bottom, it says "Webinar Presented by: Aizaz Tirmizi".

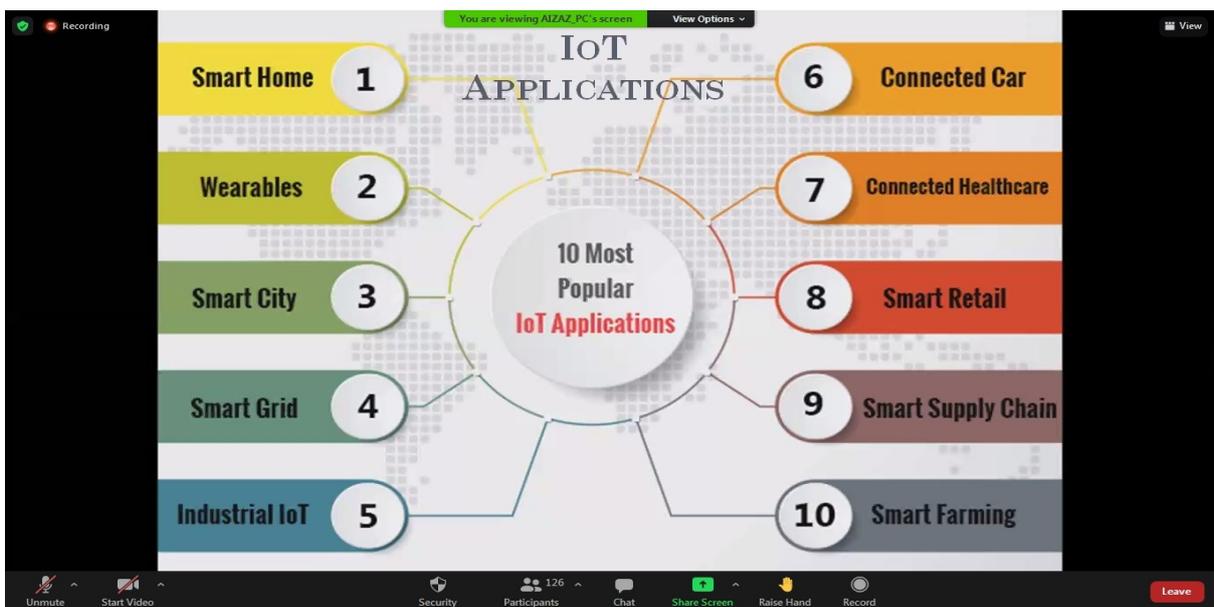

Recording

WHAT IS IOT?

- Monitoring & Controlling of devices using internet.
- IoT is a system of interrelated computing devices, mechanical and digital machines, objects and people that are provided with unique identifiers and the ability to transfer data over a network without requiring human-to-human or human-to-computer interaction

WHAT IS NODEMCU?

LAKSHMI NARAIN COLLEGE OF TECHNOLOGY EXCELLENCE, BHOPAL

- **Abhiroop Mukherjee**, student of 3rd year, **Lakshmi Narain College of Technology Excellence Bhopal**, participated in **SMART INDIA HACKATHON 2020** of hardware edition, and the team name **“BINARY BOMBER”** successfully won the contest on **24-02-2021**. They made a drone which was based on AI-ML. This drone can do its work on its best on various platforms like military and farming. It will be helpful for the armies monitoring the safer areas and farmers to monitor their farms. The management of LNCT Group has provided such platform in which the team played well. The team won the cash prize of 1 Lakh rupees. Out of the 90 total teams in final round the **“BINARY BOMBERS”** won.
