Department of Electronics & Communication Engineering

Lakshmi Narain College of Technology Excellence, Bhopal

Department of Electronics & Communication Engineering

VISION OF THE DEPARTMENT

To become reputed in providing technical education in the field of electronics and communication engineering and produce technocrats working as leaders.

MISSION OF THE DEPARTMENT

- 1. To provide congenial academic environment and adopting innovative learning process.*
- 2. To keep valuing human values and transparency while nurturing the young engineers.*
- 3. To strengthen the department by collaborating with industry and research organization of repute.*
- 4. To facilitate the students to work in interdisciplinary environment and enhance their skills for employability and entrepreneurship.*

Lakshmi Narain College of Technology Excellence, Bhopal

Department of Electronics & Communication Engineering

PROGRAM SPECIFIC OUTCOME (PSO)

PSO1: Analyze specific engineering problems relevant to Electronics & Communication Engineering by applying the knowledge of basic sciences, engineering mathematics and engineering fundamentals.

PSO2: Apply and transfer interdisciplinary systems and engineering approaches to the various areas, like Communications, Signal processing, VLSI and Embedded system, PCB Designing.

PSO3: Inculcate the knowledge of Engineering and Management principles to meet demands of industry and provide solutions to the current real time problems.

PSO4: Demonstrate the leadership qualities and strive for the betterment of organization, environment and society.

PROGRAM EDUCATIONAL OBJECTIVES (PEOs)

PEO1: Recognize and apply appropriate experimental and scientific skills to solve real world problems to create innovative products and systems in the field of electronics and communication engineering.

PEO2: To evolve graduates with ability to apply, analyze, design in Electronics & Communication Systems.

PEO3: Motivate graduates to become responsible citizens with moral & ethical values for the welfare of Society.

PEO4: Inculcate the habit of team work with professional quality of leadership to become successful contributors in industry and/ or entrepreneurship in view of Global & National status of technology.

Lakshmi Narain College of Technology Excellence, Bhopal

Department of Electronics & Communication Engineering

General Lab Policies

- All labs must be attended and completed. In the event that you cannot attend a lab, prior approval must be obtained. In such case, it is required that you make up the lab at another time.
- Satisfactory completion of all the labs is required for passing the course. If you are unable to complete the lab in the assigned lab time, it is expected that you would complete the lab on your own.
- At the beginning of a lab session, the instructor will collect report for the previous week's lab. Any late lab report will have its grade reduced. If, for any valid reason, you are not able to meet the deadline, let the instructor know well in advance of start of the lab.
- You are responsible for keeping track of your e-mail. In case of difficulty with any specific lab or any other problem concerning the lab, please come and talk to the lab instructor or use e-mail.

Course- Digital Signal Processing (EC-601)

Course Outcomes (CO's)

- CO1-** Analyze the process of converting analog signal to discrete form along with their circuits.
- CO2-** Analyze various Analogue to Digital conversion techniques along with various Line Coding methods.
- CO3-** Compare various digital transmission techniques on the base of Spectral properties.
- CO4-** Develop an expression for probability of error of different digital communication techniques.
- CO5-** Design communication systems with optimum capacity.

Lakshmi Narain College of Technology Excellence, Bhopal
Department of Electronics & Communication Engineering

DSP LAB INDEX

S.No.	List of Experiments	Date of Performing	Date of Submission	Remark
1	Write a program for Generation of Continuous and Discrete Unit Step Function signal.			
2	Write a program for Generation of Ramp and exponential signal in Continuous and Discrete domain.			
3	Write a program for addition and subtraction of two given signal (discrete and continuous domain)			
4	Write a program to generate the sample, unit step, ramp and exponential signal.			
5	Write a program to generate signal shifting, folding, addition and multiplication.			
6	To study Power density spectrum Density			
7	Implementation of Decimation-in-time radix-2 FFT algorithm FFT of a sequence using DIT-FFT method			
8	Implementation of Circular convolution and Linear convolution using DFT in Scilab			
9	Implementation of IIR digital filter using Butterworth method and bilinear transformation method.			
10	To develop program for computing DFT

Date of Experiment: _____

EXPERIMENT NO.:- 1

Aim:- Write a program for Generation of Continuous and Discrete Unit Step

Function Signal.

TOOL:- SCILAB /MATLAB

Program:-

```
t=0:4;
```

```
y=ones(1,5);
```

```
subplot(2,1,1);
```

```
plot2d3 (t,y);
```

```
xlabel('time');
```

```
ylabel('amplitude');
```

```
title('Unit Step Discrete Signal');
```

```
subplot(2,1,2);
```

```
plot(t,y);
```

```
xlabel('time');
```

```
ylabel('amplitude');
```

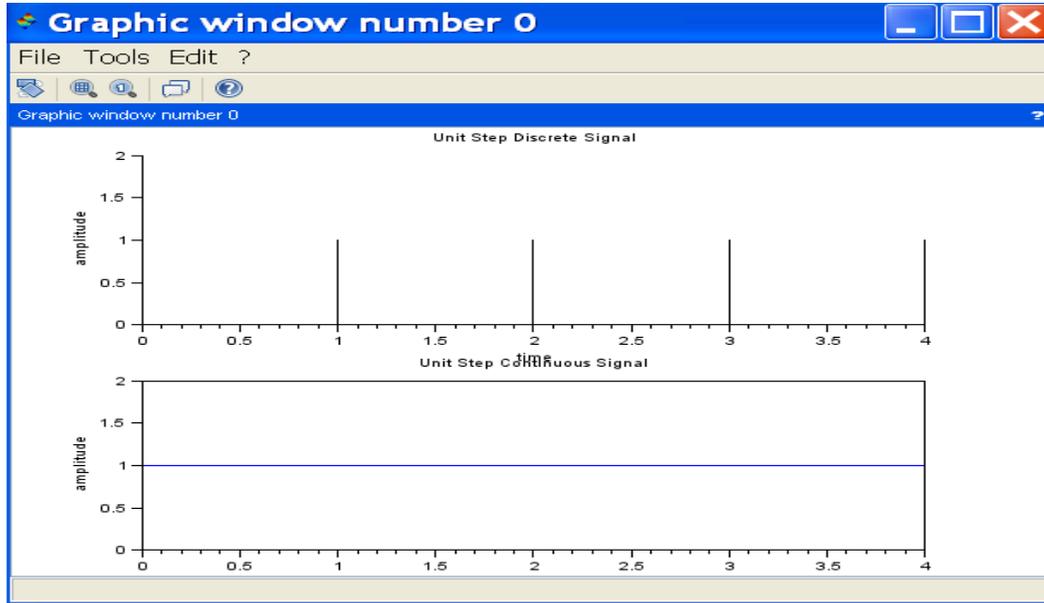

```
title('Unit Step Continuous Signal');
```

Output:
